CBC Seminar Series on Computational Cardiac Modeling

The purpose of this informal mini-seminar series to familiarize/re-familiarize ourselves with our colleagues' research and research-related topics of interest for the Computational Cardiac Modeling group. This is an open seminar and attendance of and contributions by other interested people are highly welcome.

The seminars give an opportunity for presenting surveys/introductions to fields of interest. They are also an opportunity for face-to-face discussions where everybody is invited to contribute!

The seminars will be organized on a volunteer basis, where those who would like to present a topic will give a 30 minute talk, and then open up for questions and discussion.

A rough schedule of the planned talks is as follows:

Date (dd.mm.yy)	Topic	Link to reference material
05.03.10	Basic Electromechanical Simulations, by Sam Wall	

Practical information

For information on how to get to Simula, reimbursement of expenses, hotel information and places to eat, please visit: Practical information for guests at Center for Biomedical Computing (CBC)
