Kickoff workshop for the EMC2 project - May 26-27, 2014

EMC² – ‘Embedded Multi-Core systems for Mixed Criticality applications in dynamic and changeable real-time environments’ is an ARTEMIS Joint Undertaking project in the Innovation Pilot Programme ‘Computing platforms for embedded systems’ (AIPP5). Embedded systems are the key innovation driver to improve almost all mechatronic products with cheaper and even new functionalities. They support today’s information society as inter-system communication enabler. A major industrial challenge arises from the need to face cost efficient integration of different applications with different levels of safety and security on a single computing platform in an open context. EMC² finds solutions for dynamic adaptability in open systems, provides handling of mixed criticality applications under real-time conditions, scalability and utmost flexibility, full scale deployment and management of integrated tool chains, through the entire lifecycle. The objective of EMC² is to establish Multi-Core technology in all relevant Embedded Systems domains. EMC² is a project of 99 partners of embedded industry and research from 19 European countries with an effort of about 800 person years and a total budget of about 100 million Euro.

Agenda for the WP12 meeting of EMC2 on May 26+27

Location: Simula Research Laboratory Martin Linges vei 17, Fornebu; Norway

NB: We will try to establish a Lync/Webex connection for the plenary sessions.
 If requested, it may be possible to establish a Lync/Webex connection also for selected parallel sessions.

If you need assistance on the meeting location, please contact one of: Jonathan Feinberg - mobile +47 932 14 474
 Hans Petter Dahle - mobile +47 90 12 30 67

The buffet lunches will be at the nearby hotel, and cost app. 325 NOK (40 €): Scandic Fornebu Hotel; Martin Lingesvei 2, 1364 Fornebu

Phone: +47 21 05 70 00
